

Report

Student Submissions Problems

Lab 1 - Oracle

- Jargalsaikhan Tserenlkham

- Problem: The student granted one of the **privileges** with GRANT OPTION. I included her solution for exercise 5 at the end of the report. For the tables **countries** and **continents**, she granted the privileges without GRANT OPTION, but for **cities** she gave GRANT OPTION. This exercise was 1.5p and the student got 0p/1.5p. Apparently, even if she grants just one of privileges with GRANT OPTION, **all** the points will be removed. The student needs **only 0.5** points to get a 4.
- Points: 4.5p (0.5p to get a 4)
- Grading: 2: 3<; 3: 4<=; 4: 5<=; 5: 6<=
- Why do I think she deserves the chance?
 - * She did all the **other tables** right, and she *only* needs 0.5 to get a better grade.
 - * She got a 5 in lab 2 and lab 3, and she works hard in my lab.

Lab 2 - SQL 1

- Arzumanov Mikhail:

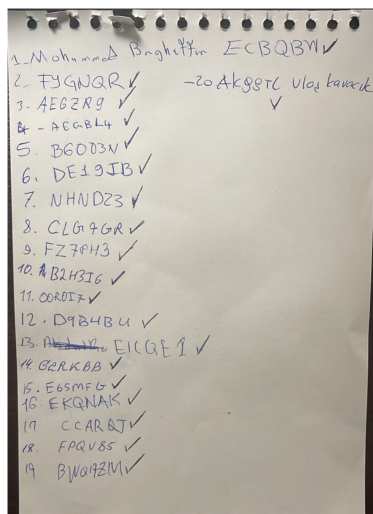

- Problem: Uploaded format in docx instead of pdf.
- Why do I think he deserves the chance?
 - * If he didn't upload in docx, he would get a grade of 5.
 - * He also got a five in the lab 3 and works hard in my lab.

General Problem

In the lab 2, there were people who left the lab without me paying attention or asking me. I noticed some empty chairs so i got suspicious. Therefore, at the end of the lab, I asked the students to sign on a piece of paper with their Neptun codes. After that, I found out that:

- Hlabangwana Lenard Tivanani (GYKM9W) **has uploaded** the lab but has not participated **until** the end.

I do not tolerate this kind of behavior. I give students in my lab more freedom so they can feel comfortable. I am not the police. But the moment it is misused, that is **intolerable**.

The following images show the privileges granted to my colleague.

	PRIVILEGE	GRANTEE	GRANTABLE	GRANTOR	OBJECT_NAME
1	SELECT	FPQV85	NO	E65MFG	COUNTRIES
2	UPDATE	FPQV85	NO	E65MFG	COUNTRIES

	PRIVILEGE	GRANTEE	GRANTABLE	GRANTOR	OBJECT_NAME
1	SELECT	FPQV85	YES	E65MFG	CITIES
2	UPDATE	FPQV85	YES	E65MFG	CITIES

Then I opened a worksheet, which gives the following

```
column privilege format a20;
select grantor
, grantee
, table name
```

	GRANTOR	GRANTEE	TABLE_NAME	PRIVILEGE	GRANT_OPT
1	E65MFG	FPQV85	CITIES	SELECT	Yes
2	E65MFG	FPQV85	CITIES	UPDATE	Yes
3	E65MFG	FPQV85	CONTINENTS	SELECT	No
4	E65MFG	FPQV85	CONTINENTS	UPDATE	No
5	E65MFG	FPQV85	COUNTRIES	SELECT	No
6	E65MFG	FPQV85	COUNTRIES	UPDATE	No
7	E65MFG	PUBLIC	E65MFG	INHERIT PRIVILEGES	No
8	FPQV85	E65MFG	CITY	SELECT	No
9	FPQV85	E65MFG	CITY	UPDATE	No
10	FPQV85	E65MFG	CONTINENT	SELECT	No
11	FPQV85	E65MFG	CONTINENT	UPDATE	No
12	FPQV85	E65MFG	COUNTRY	SELECT	No
13	FPQV85	E65MFG	COUNTRY	UPDATE	No

exercise 5

*For this exercise to work with one of my classmates, I first picked the table that I am sharing with my classmate, and from there chose the privileges section of it, and then clicked Grant. The perform grant action tab appeared, and I put the username of my colleague, which is **FPQV85**. I granted her **SELECT,UPDATE** privileges*
